Accessibility in Digital Services & Products (WCAG) — Chas Academy & Axess Lab
Member of IxDF Stockholm

All certificates are verified and available on my LinkedIn profile.

LANGUAGES

English — Fluent
Swedish — Limited working proficiency
Persian — Native

PROFILE

Coming from an Industrial Engineering background, I have spent the past three years focusing on UX/UI design and frontend development. My UX journey began with the Google UX Design Certificate and continued at Chas Academy, where I specialized in UX Design with Frontend competence. Today, I work as a UX/UI Designer and consultant at Techlove and am co-founder of Taptrigg, where I help shape product and design from the ground up. Across these roles I bring hands-on experience in product design, design systems, AI-assisted workflows, and user-centered digital experiences.

EXPERIENCE

UX/UI Designer (Intern → Contract)
Nov 2025 – Present

Techlove · Stockholm, Sweden

Co-Founder
Jun 2026 – Present

Taptrigg · Stockholm, Sweden

Sales Expert
Jun 2016 – Mar 2018

Noavaran Information Technologies Group · Tehran, Iran

CRM Specialist
Jun 2014 – Jun 2016

Kian Pardaz Hooshmand · Tehran, Iran

EDUCATION

UX Designer with Frontend Competence
Aug 2024 – June 2026

Chas Academy, Stockholm, Sweden

Learning and developing skills in HTML, CSS, JavaScript, React, and user-centered design. Gaining expertise in UX design tools like Figma and usability-focused methodologies.

Industrial Engineering, Bachelor (BSc/BA)
2004 – 2009

Sadjad Institute of Higher Education, Khorasan Razavi, Iran

Project: Production Scheduling using the Invasive Weed Optimization Algorithm, using Python.

PROJECTS

Taptrigg — Event Engagement Platform CO-FOUNDER

Built a QR-based event engagement platform from idea to launch. Led the product strategy, UX/UI design, design system, frontend implementation, and MVP development to create a seamless experience for event organizers and guests.

View project ↗

Kazify Landing Page TECHLOVE INTERNSHIP

Designed and developed the landing page for Kazify, a gig-economy mobile application that connects service providers with customers in Kenya — similar to Uber but for household services such as cleaning, plumbing, and maintenance.

View project ↗

Techlove — Design System & Website Redesign INTERNSHIP

Developed Techlove's design system and led the website redesign using AI-assisted tools (Claude, UX Pilot) to streamline design workflows.

View project ↗

Metis — Website, Design System & Brand TECHLOVE

Designed the website, design system, brand guidelines and social launch campaign for Metis, Techlove's autonomous AI debugging agent. Connected Figma to Claude Code through the Figma MCP to turn the designs into a working React code base, which I handed over to the developers to build the live site.

View project ↗

Holistal — Employee Wellbeing Platform DEGREE PROJECT

My degree project (examensarbete) — a five-week collaboration between two UX designers designing the Employee Dashboard MVP for a workplace wellbeing platform. Research-led and privacy-first, taken from UX research and high-fidelity Figma UI to a working, interactive prototype built with Claude Code.

View project ↗

Luminova — E-commerce Platform COURSE PROJECT

Designed a mobile-first e-commerce platform for lighting products, with user research, personas, and Figma prototypes, including a design system and usability testing.

View case study ↗

Kiddolink App — Parent–School Communication Tool COURSE PROJECT

Developed a parent–preschool communication app with user flows, personas, and Figma prototypes, including a design system and guerrilla usability testing. Used AI-assisted tools (Claude Code & Design, UX Pilot, Stitch, Figma Make) to speed up ideation, generate user stories, and explore multiple design alternatives.

View case study ↗

Other Coursework Projects CHAS ACADEMY

Applied UX and frontend skills (HTML, CSS, JavaScript, React) in smaller assignments, focusing on building user-centered digital experiences as websites and mobile apps.
